WINTER GARDEN | Sisteme pentru grădini de iarnă

Grădinile de iarnă protejează spațiul interior de condițiile meteo exterioare și permit utilizarea terasei pentru perioade mai îndelungate.

Aceste structuri combină funcționalitatea cu un aspect estetic.

Suprafețele vitrate aduc lumină naturală și păstrează legătura vizuală cu exteriorul pe tot parcursul anului.

Sistemele completează arhitectura clădirii și pot fi integrate în diferite proiecte.

MATERIALE ȘI FINISAJE

Culori la alegere, conform paletarului RAL.

Rezistență la condiții meteo precum ploaia și vântul.

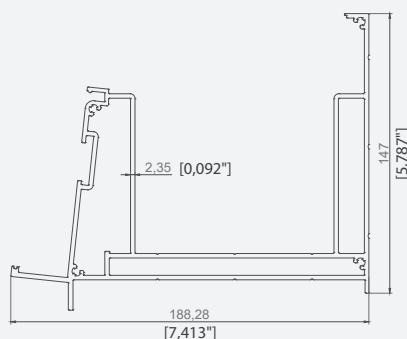

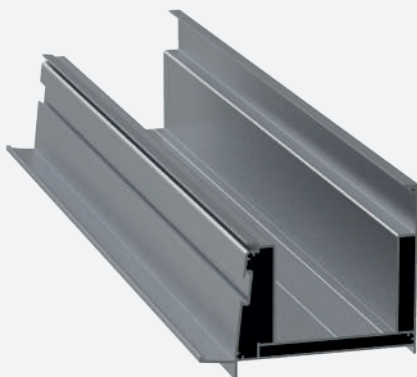

Materiale: aluminiu 6063 T5, oțel inoxidabil și Delrin.

LUMINĂ NATURALĂ ȘI CONFORT

Pereții și acoperișurile vitrate favorizează lumina naturală și creează un spațiu deschis vizual.

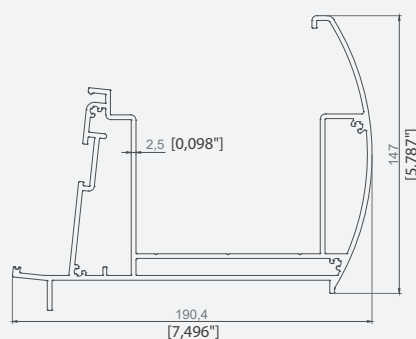

Se pot integra sisteme de încălzire pentru sezonul rece și sisteme de răcire pentru controlul temperaturilor ridicate din timpul verii.
